**LINVISIBILE**

**Zefiro System |**  
Sistema Zefiro

With the Zefiro System, Linvisibile diversifies its product range, with a proposal that looks decisively to the world of furniture; the first step towards the development of design products by Linvisibile brand, specifically designed to furnish residential and contract spaces.

Zefiro system is a real furnishing complement composed of pivoting panels that are light and easy to handle, for the compartmentalization of the rooms. They can be developed from floor to ceiling, or at a predefined height, rotating on a central pivot that allows a 360° movement.

The modularity of the system gives great design freedom, both for the number of panels and for the finishes applicable on them, depending on the space you want to compartmentalize.

Zefiro System is proposed in 2 versions: with an anodized outer frame system which embraces the finish -chosen from a wide range of textures-, and with a 50 mm thick wood-based panel.

**FLY Version.** Upon request, Zefiro can be equipped with rails to allow each leaf to slide either, individually or in unison, enabling the leaves to approach each other and fold up on the desired side with minimum space, thus allowing passing through unencumbered.

Con il Sistema Zefiro, Linvisibile diversifica la propria gamma prodotti, con una proposta che guarda in maniera decisa al mondo dell'arredo; il primo passo verso lo sviluppo di prodotti di design a marchio Linvisibile, pensati appositamente per arredare gli spazi residenziali e contract.

Si tratta di un vero e proprio complemento d'arredo composto da ante pivotanti affiancate, leggere e maneggevoli, per la compartizione degli ambienti. Si possono sviluppare da pavimento a soffitto, ad un'altezza predefinita, ruotando su un perno centrale che consente una movimentazione a 360°.

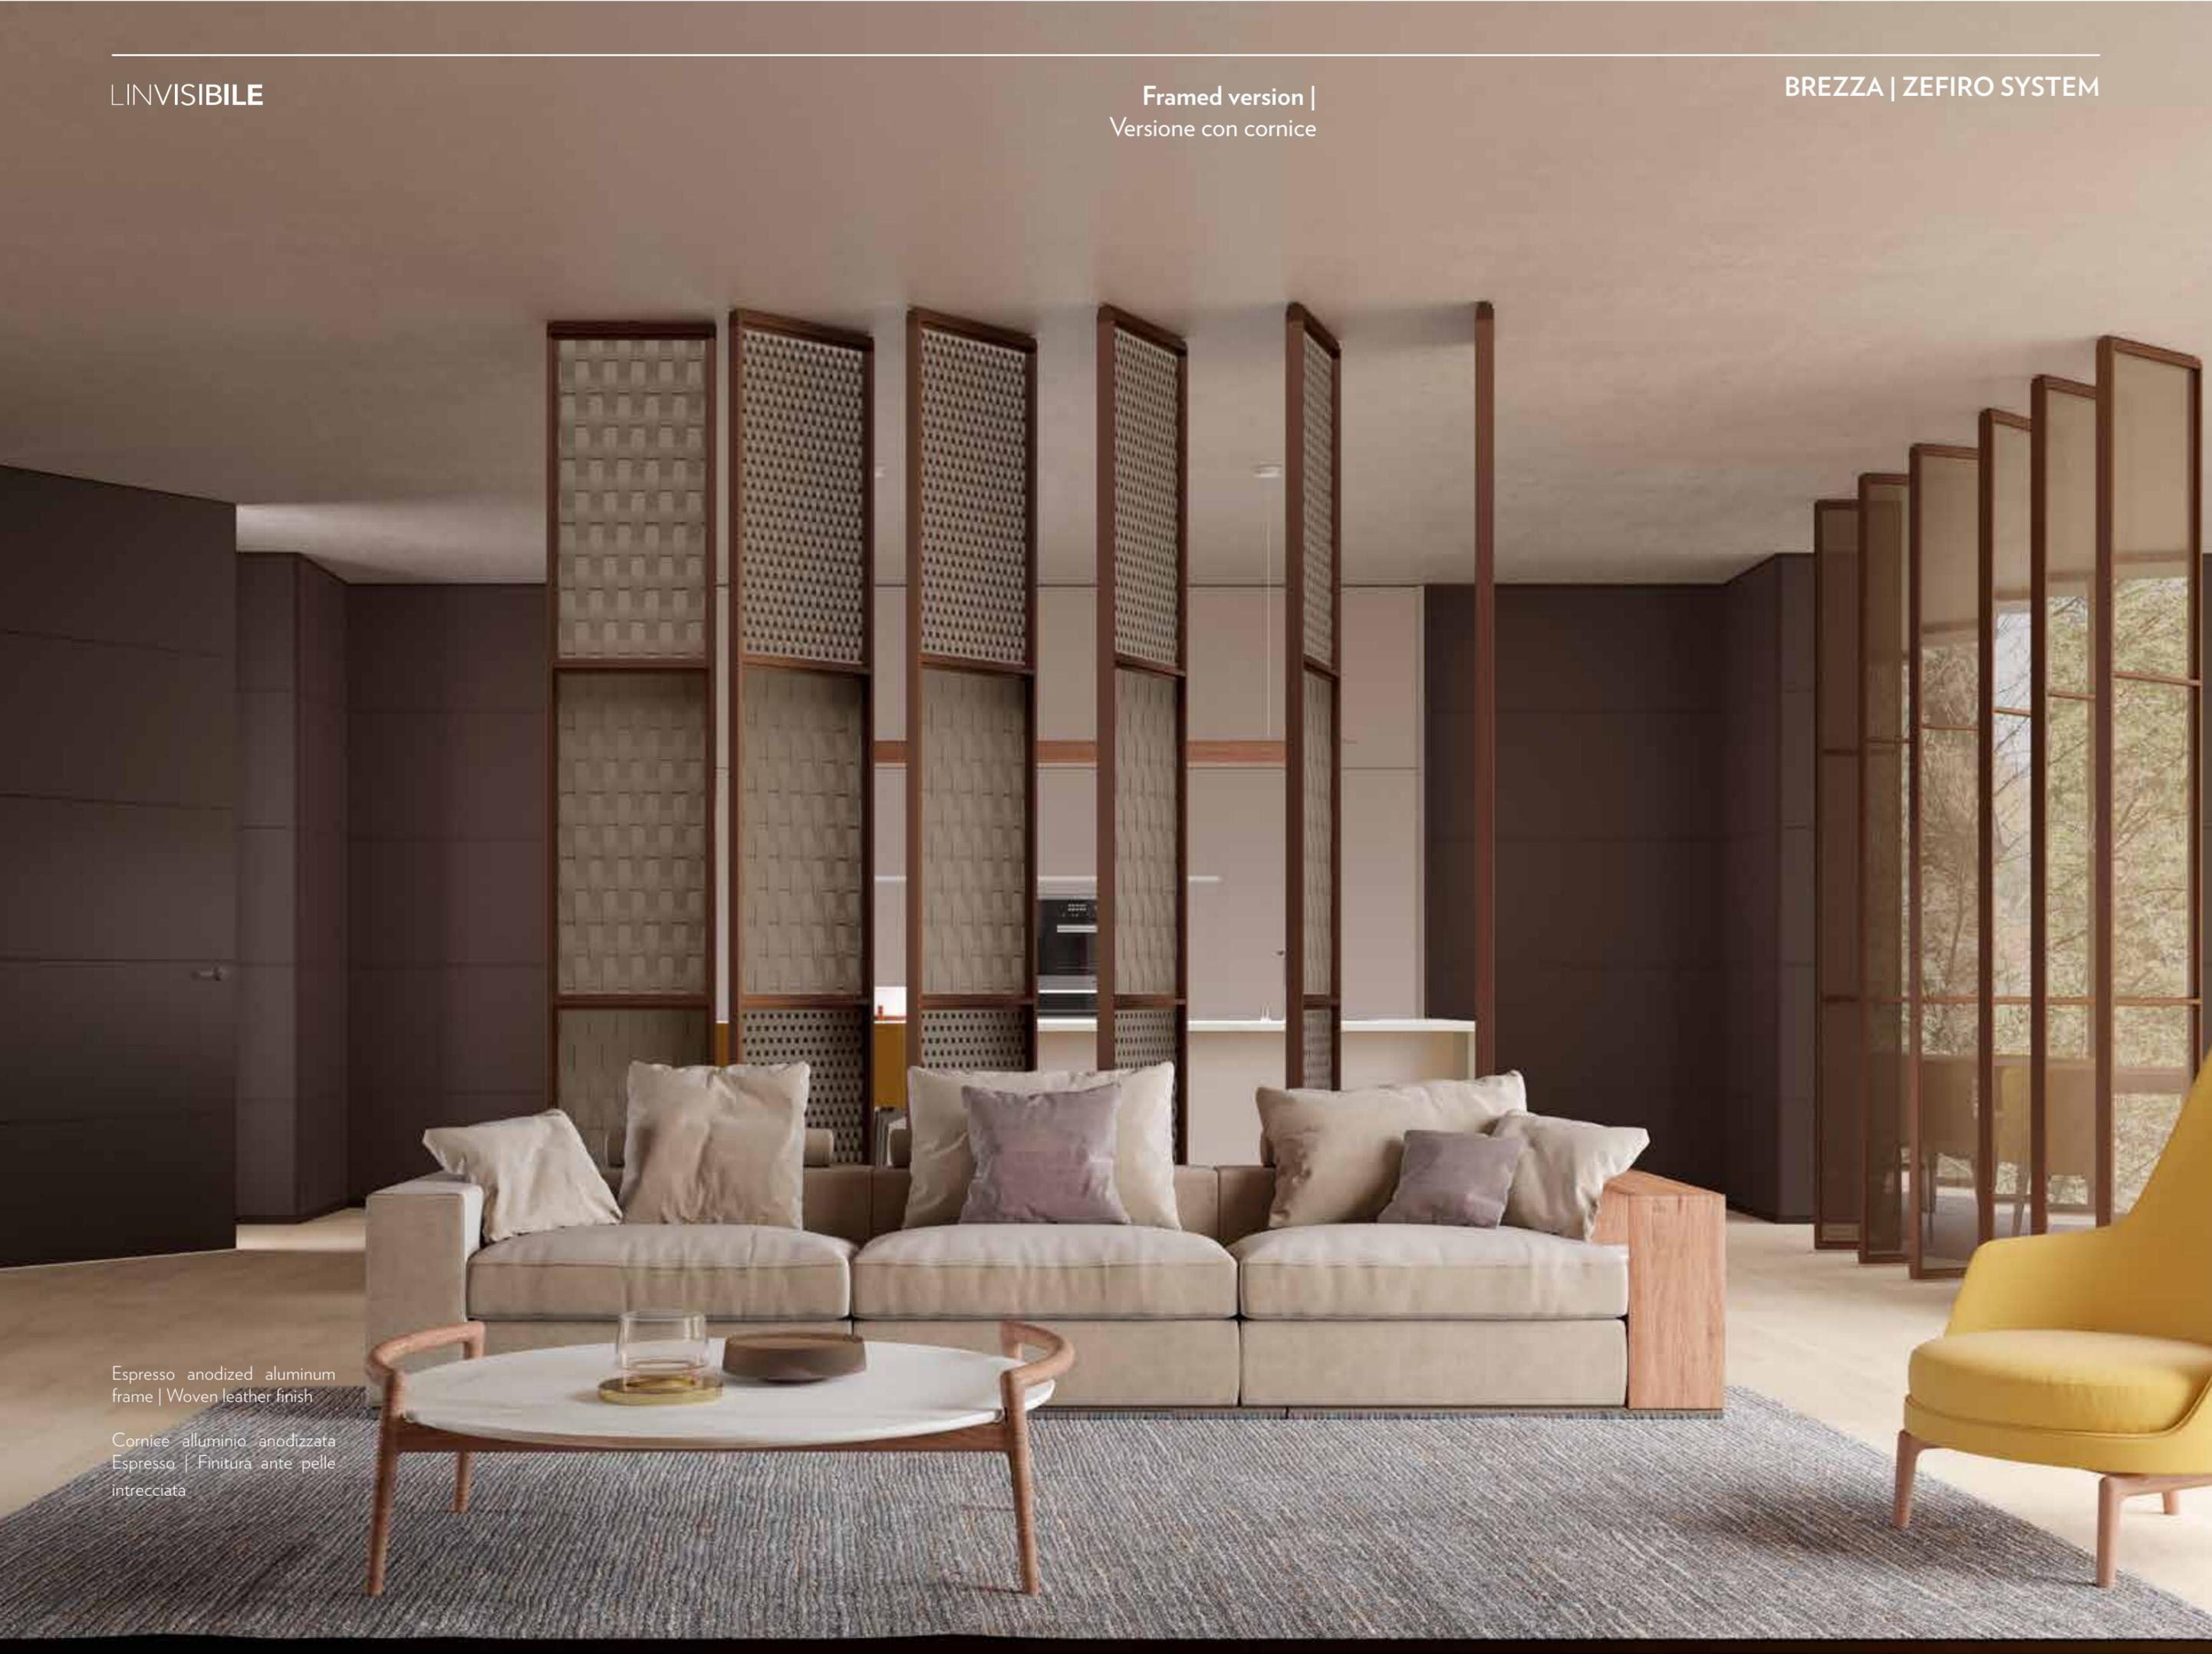

La componibilità del sistema lascia grande libertà progettuale, sia per il numero di ante -sia per le finiture applicabili su di esse- a seconda dello spazio che si desidera compartimentare.

Sistema Zefiro è proposto in 2 versioni: con sistema di cornice perimetrale anodizzata che abbraccia la finitura, a scelta fra un'ampia gamma di textures, e con pannello a base legno, di spessore 50 mm.

**Versione FLY.** A richiesta, Zefiro può essere dotato di un binario a filo pavimento e soffitto che permette lo scorrimento di ogni anta, singolarmente o in gruppo, consentendo alle stesse di impacchettarsi sul lato desiderato, consentendo il libero passaggio.

*The Zefiro System is available in two versions:*

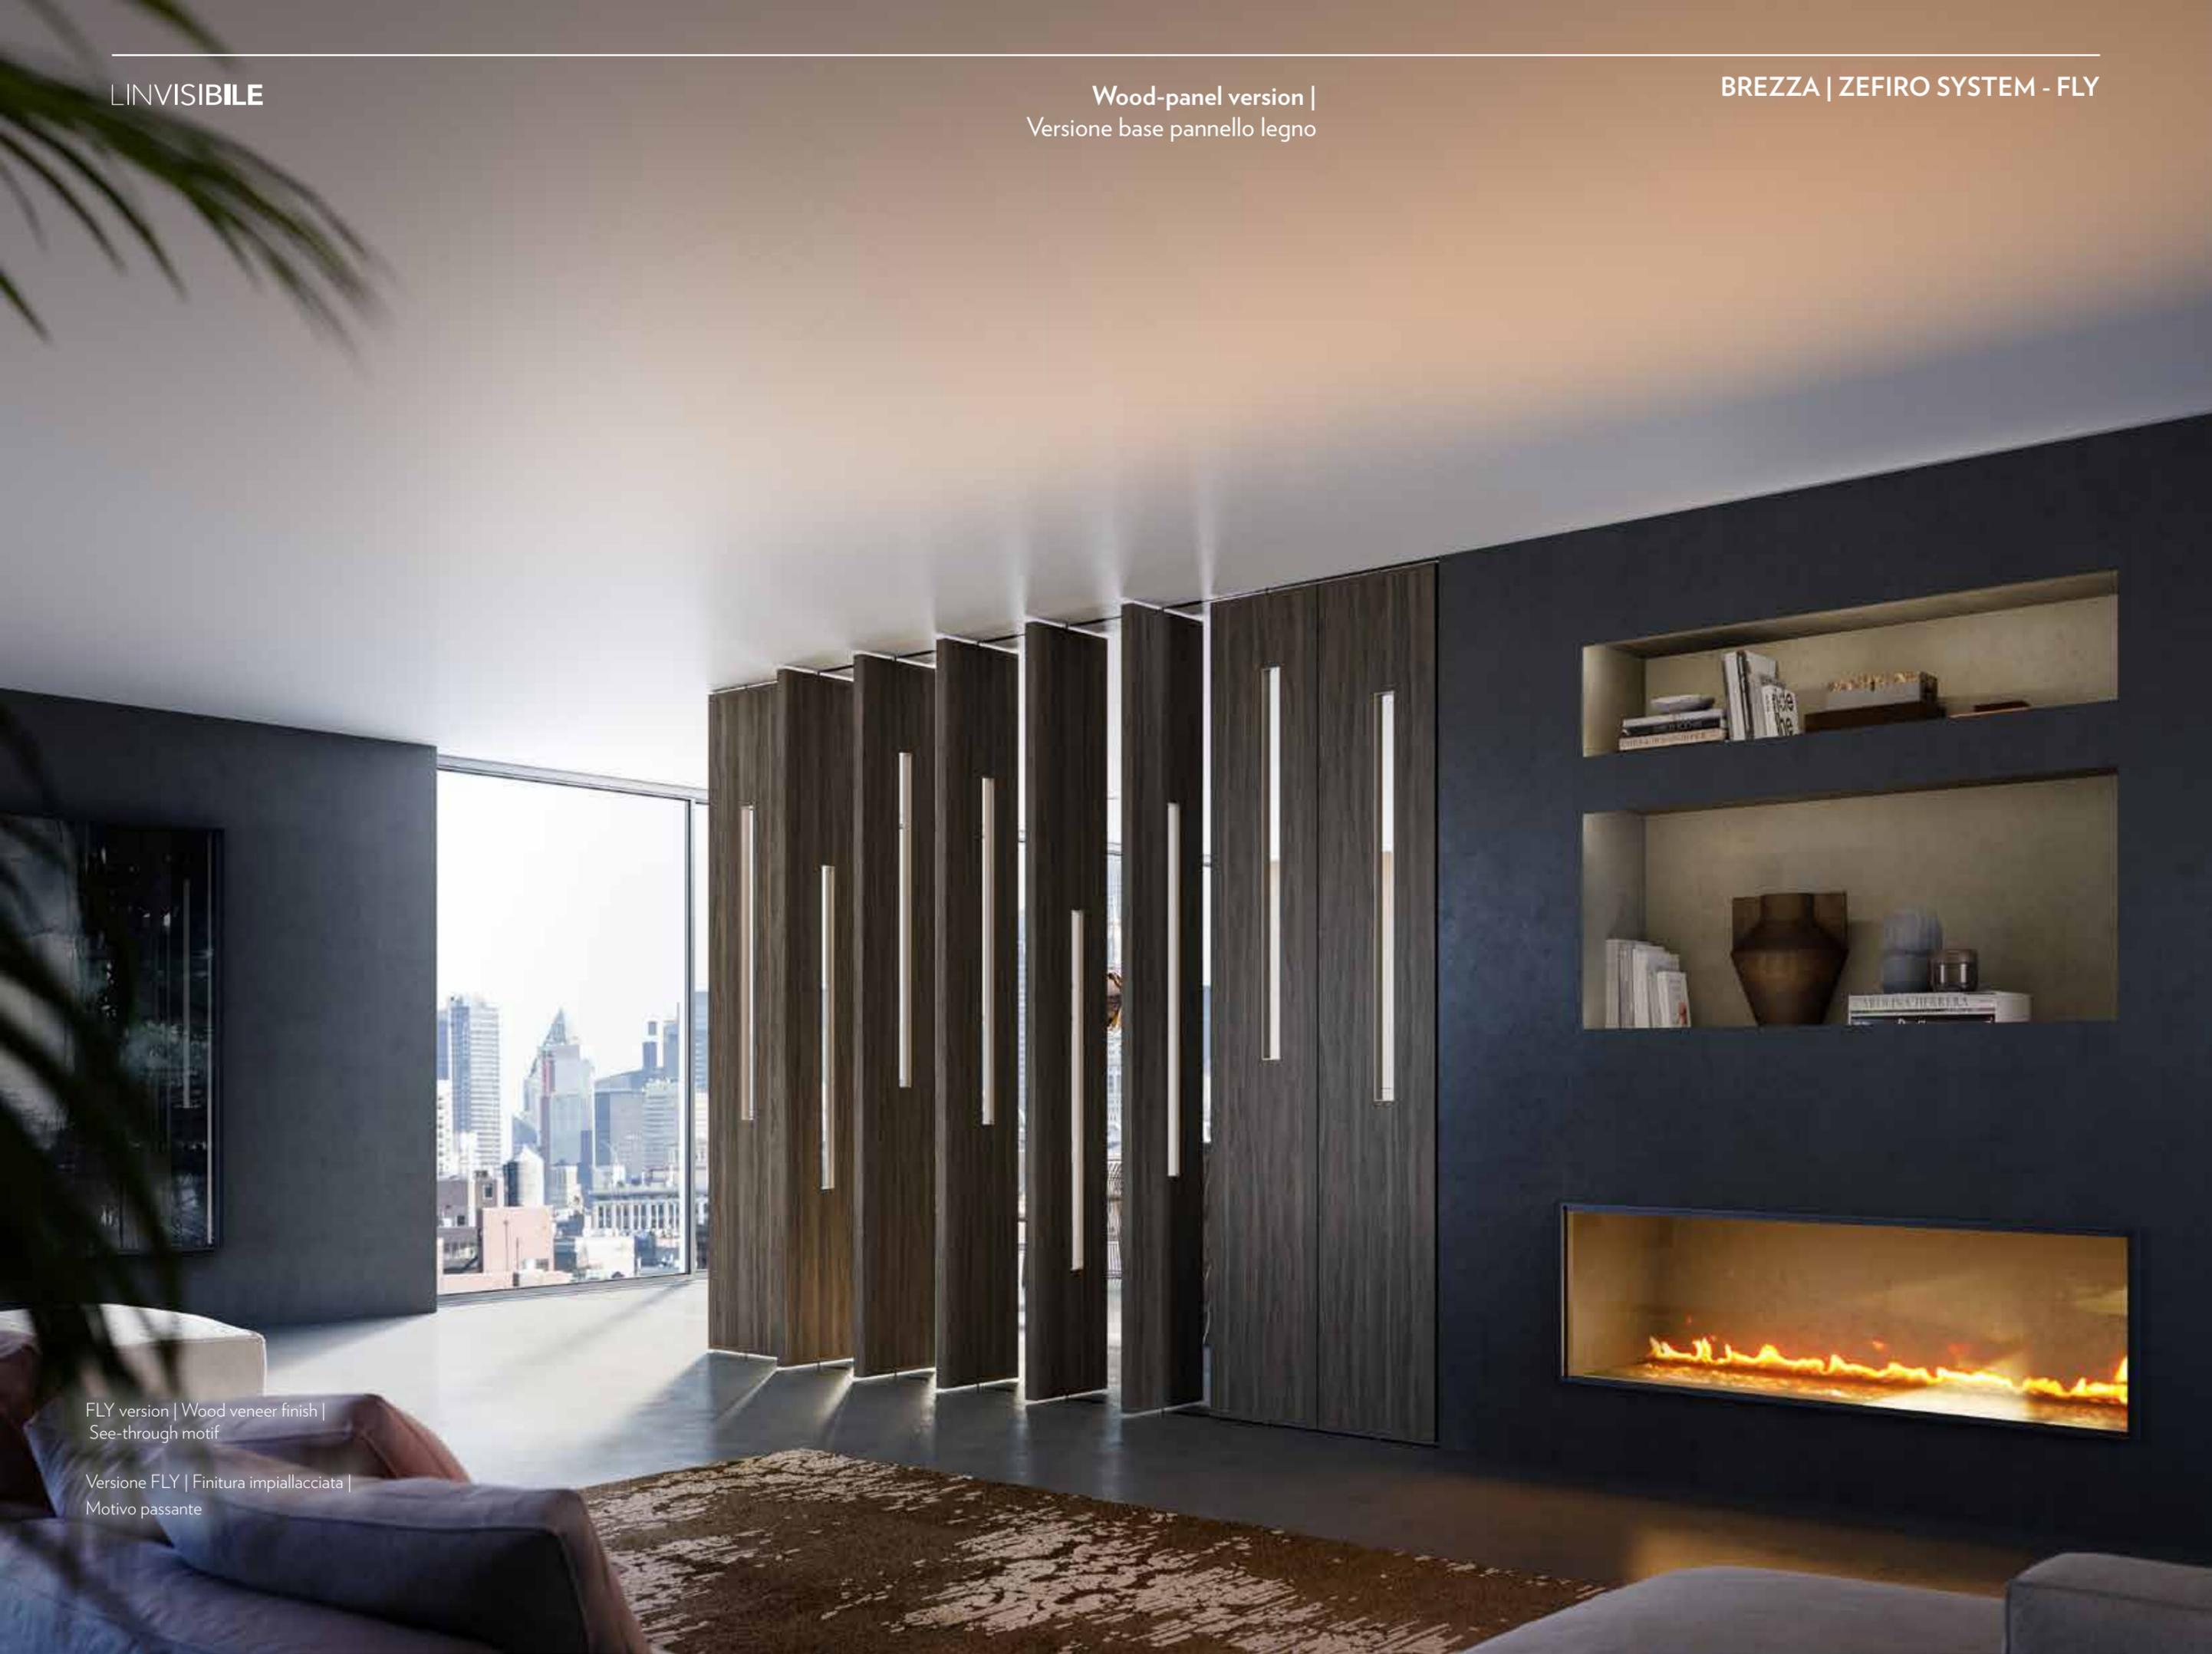

**Zefiro System wood-based panel version:** it's composed of 50 mm thick hollow-core panels (honeycomb) made of perimetric hardwood and polished MDF sides. Panel without rebate to allow the leaf's complete rotation, predisposed for housing the lower and upper pins. Available in finishes: base coat, natural and veneered wood, lacquered (also moulded panel). Class E1, low formaldehyde emission.

**Zefiro System framed version:** the panels are composed of a perimetric frame in extruded aluminium 50 mm thick, which can be anodized or painted in various colours, and allows the insertion of different finishes: retro lacquered glass, special glass, mirror, leather, metal, ceramic, fabric, etc., also combinable between each other. The customer can further customize the product by requesting only the frame (supplied disassembled) in which he must insert his own finish (developed in accordance to the specifications provided by LINVISIBILE).

*Il Sistema Zefiro è realizzabile in due versioni:*

**Sistema Zefiro versione pannello a base legno:** prevede ante composte da un pannello tamburato di spessore 50 mm realizzato con legno duro perimetrale su 4 lati e facce in MDF levigato. Pannello senza battuta per permettere la rotazione completa dell'anta, predisposto per l'alloggiamento dei perni inferiore e superiore. Disponibile in finiture: mano di fondo, legno impiallacciato e naturale, laccato (anche pantografato). Classe E1, bassa emissione di formaldeide.

**Sistema Zefiro versione con cornice:** prevede ante con cornice perimetrale in alluminio estruso di spessore 50 mm anodizzabile o verniciabile in vari colori, che ospita le diverse finiture: vetri retrolaccati, vetri speciali, specchi, pelle, metallo, ceramica, tessuto, ecc., anche combinabili tra loro. Il cliente può customizzare ulteriormente il prodotto richiedendo solamente la cornice (fornita disassemblata) in cui dovrà inserire la propria finitura (prodotta su le specifiche fornite da LINVISIBILE).

**Technical features**

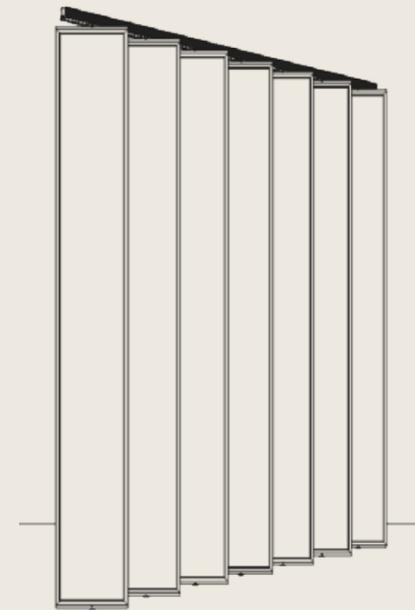

Its reduced frame offers the possibility of creating systems with a high number of panels, and can be realized in two alternative configurations:

- With UPPER BEAM, which guarantees the perfect anchoring of aluminium to the ceiling (masonry and plasterboard), supplied in parts to facilitate its transportation, and to be assembled via joints before ceiling installation. Paintable with good quality water-based paints, enamels, etc.
- With a TEMPLATE for the positioning of the pins directly to the finished ceiling.

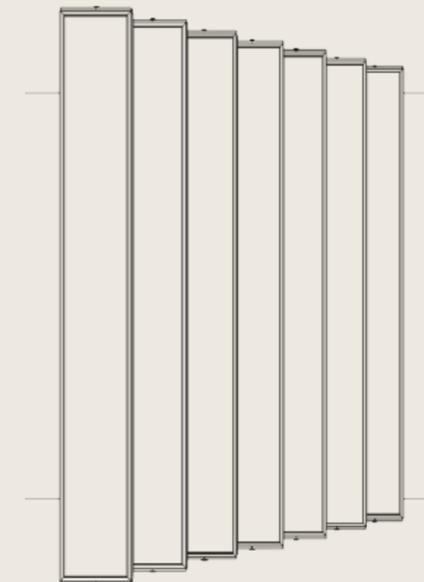

**Caratteristiche tecniche**

Il telaio ridotto offre la possibilità di realizzare sistemi con un numero di ante anche elevato, ed è realizzabile in due configurazioni alternative:

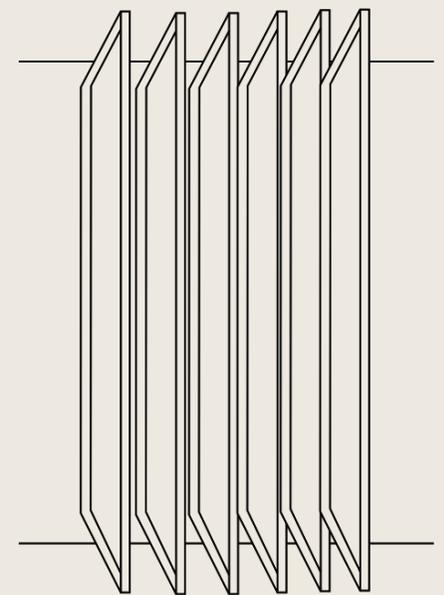

- Con TRAVERSO, che garantisce il perfetto ancoraggio dell'alluminio al soffitto (muratura e cartongesso), fornito in più parti per facilitarne il trasporto, e da assemblare tramite giunti prima dell'installazione a soffitto. Verniciabile con idropitture di buona qualità, smalti, ecc.;
- Con DIMA per il posizionamento dei perni direttamente a soffitto finito.

**Type of opening and panel configuration**

Tipologia di apertura e configurazione ante

**Dimensions and personalization**

Both systems can be manufactured in a multi-panel composition, with a defined width of 300, 400 and 500 mm, in height from 1900 mm to 3500 mm.

Technical characteristics:

- On both versions; possibility of finishes with see-through motifs (after previous evaluation by the technical office);
- Available in masonry or plasterboard versions;
- Aluminium cross-piece divided into several parts to be joined on site;
- Gaps: upper 8 mm, lower 6 mm, between the panels 8 mm, in regards of the wall (if present): 4 mm;
- It is possible to supply panels of different widths in the same system.
- Mechanical / electric locks not foreseen;
- The application of handles is not foreseen.

**Dimensioni e particolarità tecniche**

Entrambi i sistemi sono realizzabili in composizione multianta, di larghezza definita da 300, 400 e 500 mm, in altezza da 1900 mm a 3500 mm.

*Particolarità tecniche:*

- Su entrambe le versioni; possibilità di finiture traforate con motivi passanti (previa valutazione dell'ufficio tecnico);
- Realizzabile in versione muratura/ cartongesso;
- Traverso in alluminio suddiviso in più parti da giuntare in opera;
- Sfiori: superiore 8 mm, inferiore 6 mm, tra le ante 8 mm, rispetto al muro (se presente) 4 mm;
- È possibile fornire ante di diversa larghezza nello stesso sistema;
- Non previste serrature meccaniche o elettriche;
- Non previste maniglie.

**Accessories**

**PIVOT.** The Zefiro System rotation is given by a mechanism of pins that guarantees lineal motion, neat and stylish. Together with the pivot the relevant TEMPLATE to drill the hole in the floor is always supplied.

**MAGNETS.** The leaves are equipped with magnets that allow them to be perfectly aligned with each other in the rest position.

**RAILS.** Fly version is equipped with 2 rails to embed flush to the floor and to the ceiling, with a footprint of 40 cm.

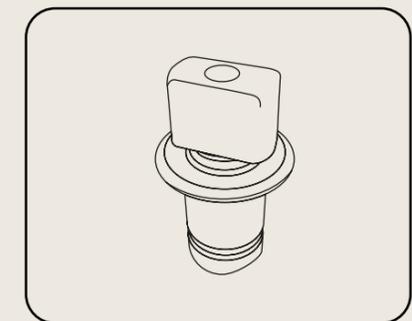

**Accessori**

**PERNO.** La rotazione del Sistema Zefiro è determinata da un sistema di perni che garantisce un movimento lineare, pulito ed elegante. Assieme al pannello de Linvisibile Sistema Zefiro viene fornita sempre l'apposita DIMA, per la realizzazione del foro a pavimento.

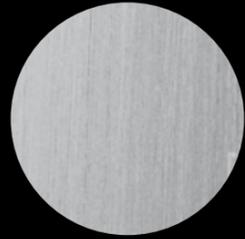

**MAGNETI.** Le ante sono dotate di magneti che consentono alle stesse di allinearsi perfettamente fra di loro in posizione di riposo.

**BINARIO.** La versione Fly, è dotata di un binario a sfioro pavimento e uno a soffitto, con ingombro di circa 40 mm, da incassare.
